REALIZATION OF A MULTI-FLOOR PARKING WITH SHOPPING CENTER AND SERVICE SECTOR STORES LOCATED AT CAPRUZZI STREET IN BARI MUNICIPALITY

Activities: Preliminary report, VAS screening procedure

Description of activities:

The aim of this project is to build a multiuse structure located in the City of Bari, Via G. Capruzzi using a special Agreement Program between the Private and Public Bodies. The building will offer enough space for parching service industries shopping stores art gallery intergraded Subway pedestrian tunnel to replace the actual railway crossing street level.

in particular:

- The garage will be the whole 2nd underground floor and also the 2 nd, 3 rd, 4 th and 5 th floor of the building, with a totally of 6.100 mq parching surface.
- The ground floor dedicated in two commercial stores with 1.253 total surface
- The entire first floor to office spaces except a part that will be provided without charge to the municipality for offices spaces too.
- The tunnel will be made of a straight ramp in north-south direction, which will be connected, in line with the subway pedestrian project carried out by the italian railway network manager RFI in order to connect Tunisi street to Capruzzi street and replace the actual railway crossing street level

- **The project will improve the urban mobility and facilitate the pedestrians to cross the railway and also will move the entrance of the subway pedestrian tunnel to the capruzzi street , in highly visible and easily accessible point, providing a service to all the inhabitants of the S. Paquale district.**
