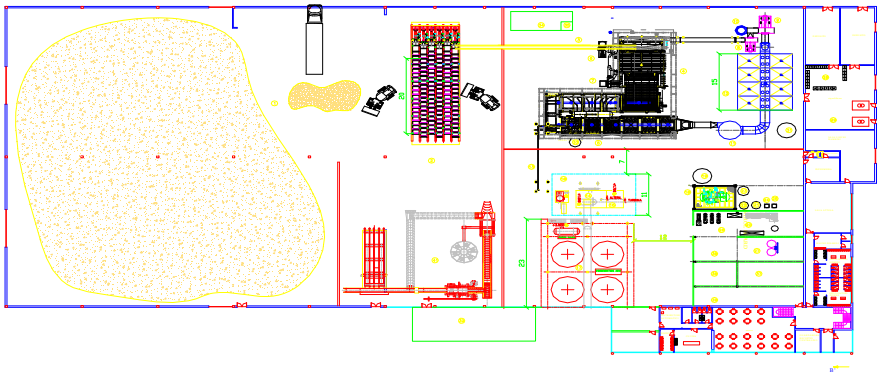
BIOMASS POWER PLANT WITH 10 MW INSTALLED CAPACITY

Activities: Realization of a biomass power plant with 10 MW placed in Santeramo in Colle in "Alessandriello - Montefungale" district



A biomass power plant with the capacity of 10 MW which use lignocellulosic biomass that is available in the region.

The facility will consist of:

- line of combustion and heat recovery as superheated steam;
- treatment fumes purification line;
- electricity production line;
- system of management , protection and control;
- civil works and equipment rooms;
- general services

The heating plant will use the mobile grid system as the most advance and popular combustion system and will be organized a biomass agro-energetic supply chain.
